

EHS Technologies was formed in November of 1996 to provide high quality information technology, environmental, engineering, program management, logistics, training, and communications-related products and services to government and commercial customers.

-2011 Revenues were approximately \$21.9 Million

-2012 Revenues projected to be approximately \$22.1 million

## **Environmental Support Services**

- EHS Technologies understands the interrelationships between a customer's mission and environmental responsibilities. We provide cost-effective solutions to meet environmental requirements in support of mission accomplishment.
- EHS assists managers in formulating proactive programs that add up to continued mission accomplishment in an environmentally acceptable manner.
- EHS provides the tools necessary to fulfill environmental program management responsibilities such as:
  - Environmental Compliance Evaluations
  - NEPA Services
  - Hazardous Waste Management
  - Environmental Management Information Systems
  - Geographical Information Systems
  - Training and Awareness Programs

## **Environmental Projects at EHS**

### **Environmental Engineering**

- Analysis of Environmental, Health, and Safety Requirements
- Development and Implementation of Environmental Quality Assessment Programs and Environmental Management Systems
- Environmental Planning and Engineering
- Implementation of Best Management Practice related to Environmental Management
- Development of Pollution Prevention Plans

### **Environmental Management/ Engineering Services**

- Environmental Program Management Software
- Computer-based and Computer managed Environmental Training Programs
- Hazardous Material Control and Management Planning
- Development of Site Specific Hazardous Waste Management
- Remote waste water discharge monitoring requirements

### **Environmental Training**

- Certified Environmental Trainer (CET) on staff.
- Development and Delivery of Environmental Training Programs.
- Training Needs Assessment.
- Conducted over 1,000 environmental, health and safety training classes for commercial and government clients.
- Created site-specific Environmental Awareness training content for Naval Air Station Patuxent River, MD.

## **Past EHS Environmental Projects**

- Performed over 100 Environmental Education Surveys (EES) of shore station and tenant activities at Naval Air Station Patuxent River, MD to determine their environmental compliance status.
- Prepared and published the annual Root Cause Analysis Report for NAS Patuxent River that analyzes all compliance deficiencies at the NAS for root causes and includes recommendations for corrective actions.
- Performed internal Environmental Performance Assessments for U.S. Army Signal Command Facilities world-wide.
